This was grazing chart was created as part of the Missouri Climate-Resilient Crop & Livestock (CRCL) project, an effort by the Center for Regenerative Agriculture at the University of Missouri. The CRCL project aims to promote climate-resilient crop and livestock systems through diverse practices, including regenerative grazing, silvopasture, diverse cover crops, and appropriate nutrient management. For more information, visit www.cra.missouri.edu.

Similar grazing charts have been developed and made available by other individuals and entities, and we acknowledge and appreciate their contributions to regenerative agriculture, including: Troy Bishopp, On Pasture, the Madison
